impact of individual and collective volunteer
efforts.

Spring Thaw Tips:

Spring not only brings warm temperatures it also
brings the threat of flooding, with melting snow or
heavy snow and rains.

Some tips to help mitigate potential problems:

- Shovel snow from around your foundation.
Allow the water to drain away from your home.
Take special notice around basement window sills.
- Take notice of any developing ice ridges that
are building and chip them down to allow drainage.
- Clear eavestroughs and roof of excess snow.
Extend downspouts if possible, at least 6 feet from
the foundation. Protect against ice damming.
- Do not shovel snow onto the street or pile on
the sidewalk.
- Check to make sure your sump pump is work-
ing to pump out any water that makes it to your
sump.

It is important to be considerate of your neighbors
and work with them to prevent water from being
drained onto each other's properties.
